雙叉流

Shuangjiou National Forest Recreation Area

景點介紹
雙叉流林遊樂區為民國五十四年聯合園遊會開幕，當時為配合林務管理工程地區之一，當時僅為觀光園林，僅有「雙叉」櫻花山莊，多年後隨著林務管理與生態環境的改善，本遊樂區即於民國五十六年，從舊址遷往新址，並改名為「雙叉流」，又稱「雙叉山莊」。

紅頭山猴
Red-headed Titi

本園區海拔高度自150公尺至600公尺間，面積約為1600公頃，屬熱帶季風林，青山綠水環繞整個園區，山徑和山亭錯落有致，茂密的植物相，綠意了無和水源，提供各類動物棲息的環境，處處可見的瀑布及清澈涼爽的溪水，吸引不少遊客，是登山、健行享受森林的好地方。

白腹太陽鳥
Garrulucystes albertus

鵟形鷹類
Gray-cheeked Kestrel

The Shuangjiou National Recreation Area was included in the 1956 10th World Wildlife Conference. The park is one of the few remaining forest fragments found in the park, including Fragaria, Citrus, Litchi, and other species. Swietenia Mahagoni, in only a few decades, Shuangjiou has grown into a rich and vibrant forest that provides a beautiful landscape to visitors. The park is located by National Highway 13 miles from Feng Gang heading toward Taitung. The park encompasses 1,600 hectares of 150

to 650 meters above sea level. The park is a sub-tropical climate zone monsoon forest and there is little variation between day and night temperature. The entire area is filled with valleys of green plants and live-dead trees, protecting water resources, and local animal habitats are preserved. Here visitors hiking and mountain climbing are able to understand ecology and experience biological diversity, hearing monkey call out, creeks tumbling, and the sound of falls.
